ABOUT THE STRATEGY**:-

Combination of top down & bottom up stock picking and High Conviction

Alchemy High Growth Select Stock (AHGSS) strategy plays to Alchemy's strengths in top down and bottom up research and stock picking. Investment team at Alchemy has demonstrable long term track record of finding winners. True characteristics of finding winners requires, a deep understanding of the businesses and the drivers of long term sustainable performance in companies, which may then translate into long term return performance. An understanding of the business and value drivers enable us to play the entire growth cycle of the company. A long term investment approach helps us to take advantage of not only earnings growth but also potential valuation re-rating of the business which may produce superior returns.

Over diversification dilute returns

Markets are cyclical, oscillating between bull, bear and sideways/consolidated phases over time. While a well diversified portfolio is essential to capture a wide variety of businesses, too much diversification tends to dilute returns unless we are in a roaring bull market where the tide lifts all boats. But more often than not markets experience short periods of bull & bear cycles with large intervening periods of sideways to consolidation phases in a range. A concentrated portfolio helps to focus more on individual stock performance and returns somewhat reducing the correlation to broad market index returns albeit, over the long run. While in the short to medium term (typically less than 3 years), the portfolio returns could trend with the market, a concentrated portfolio of stocks, if well selected, has higher probability to outperform the markets.

A differentiated strategy for UHNI, Family Offices & large allocators

It is our experience that most large investors like UHNI's, Family Offices and large allocators already tend to have exposure to the broad markets by virtue of direct investing, allocation to MF and PMS's. Hence a slice of the capital allocated to a concentrated strategy makes eminent sense as the investor is already diversified and differentiated strategy can help generate differentiated returns.
